

Table of contents

Editorial	19
<i>John V Stafford</i>	
Section 1 - Keynotes	21
A systems view of agricultural robots	23
<i>B.S. Blackmore</i>	
Precision agriculture for arable crops in the United Kingdom	33
<i>R.J. Godwin</i>	
Farmer trials and experience prove the adoption of precision agriculture technologies is profitable in Western Australia (WA)	49
<i>I.R. Maling, M. Adams, M. Robertson, B. Isbister and W.J. Bowden</i>	
How wireless will change agriculture	57
<i>G. Vellidis, V. Garrick, S. Pocknee, C. Perry, C. Kvien and M. Tucker</i>	
Section 2a - Spatial variability: soil	69
Soil spatial variability in small Greek apple orchards	71
<i>K.D. Aggelopoulou, D. Pateras, S. Fountas, T.A. Gemtos and G.D. Nanos</i>	
Analysis of spatial soil moisture variation on a cracking clay soil for optimizing sprinkler irrigation management	79
<i>S.A. Al-Kufaishi, J.R. Jensen and J.W. Sands</i>	
Influence of the pedo-climatic variability in Haute-Normandie (NW France) on the intra field spatial variability on yields of wheat and oilseed rape	87
<i>C. Duval, V. Debandt, J-P. Eveillé, D. Mahieu, S. Taïbi and J-M. Llorens</i>	
Depth sounding with the EM38—detection of soil layering by inversion of apparent electrical conductivity measurements	95
<i>R. Gebbers, E. Lück and K. Heil</i>	
Anisotropy in spatial measurements of mouldboard plough draught	103
<i>N.B. McLaughlin and D.R. Lapen</i>	
Classification of soil texture classes for on-the-go management of soil VIS-NIR spectra	109
<i>A.M. Mouazen, R. Karoui, J. De Baerdemaeker and H. Ramon</i>	
The scale dependency of terrain attributes impacts their relationship to corn grain yield in rolling landscapes	117
<i>E.M. Pena-Yewtukhiw, J.A. Thompson and J.H. Grove</i>	
On-line soil NIR spectroscopy: identification and treatment of spectra influenced by variable probe distance and residue contamination	125
<i>B. Stenberg, G. Rogstrand, E. Bölenius and J. Arvidsson</i>	
Precision agriculture '07	9

Mapping subsoil acidity and shallow soils across a field using information from yield maps, geophysical sensing and the grower <i>M.T.F. Wong and S. Asseng</i>	133
Section 2b - Spatial variability: crop	141
Nitrogen prediction in potato petioles based on spectral data and hyperspectral images <i>Y. Cohen, Y. Zusman, V. Alchanatis, Z. Dar, D. Bonfil, A. Zilberman, A. Karnieli, V. Ostrovsky, A. Levi, R. Brikman and M. Shenker</i>	143
Site-specific management of pH-induced iron chlorosis of maize <i>R.B. Ferguson, T. Kyaw, V.I. Adamchuk, D.D. Tarkalson and D.L. McCallister</i>	151
Identification of site-specific anomalies of crop vigour using simulated endmembers for spectral mixture analyses <i>J. Franke and G. Menz</i>	157
Physically-based modeling of photosynthetic processes <i>T. Hank, N. Oppelt and W. Mauser</i>	165
Non-contact measurement of the actual nitrogen status of winter wheat canopies by laser-induced chlorophyll fluorescence <i>B. Limbrunner and F.-X. Maidl</i>	173
Assessment of vertical variation of chlorophyll using hyperspectral, multi-angular imagery <i>N. Oppelt, T. Hank and W. Mauser</i>	181
Comparison of narrow-band and broad-band vegetation indices for canopy chlorophyll density estimation in sugar beet <i>M. Vincini, E. Frazzi and P. D'Alessio</i>	189
Section 2c - Spatial variability: analysis and mapping	197
A multivariate geostatistical approach to delineate areas at soil salinisation risk <i>A. Castrignanò, G. Buttafuoco, R. Puddu and C. Fiorentino</i>	199
Standardized variograms from ancillary for kriging soil data <i>R. Kerry and M.A. Oliver</i>	207
A comparison of error propagation analysis techniques applied to agricultural models <i>M. Marinelli, R. Corner and G. Wright</i>	215
Introducing Fuzzy Cognitive Maps for decision making in precision agriculture <i>Ath. Markinos, El. Papageorgiou, Chr. Stylios and Th. Gemtos</i>	223
Evaluation of digital terrain models derived from data collected with RTK-GPS based automatic steering systems using a high precision laser scanner <i>P.O. Noack, T. Muhr, M. Schönfelder, J. Kutschera, P. Hancock and T. Selige</i>	233

Modeling for precision agriculture: how good is good enough, and how can we tell? <i>E.J. Sadler, J.W. Jones and K.A. Sudduth</i>	241
A technical opportunity index based on mathematical morphology for site-specific management using yield monitor data: application to viticulture <i>B. Tisseyre and A.B. McBratney</i>	249
Geostatistical analysis of soil fertility data sampled in two consecutive years in Castilla, Spain <i>S.R. Vieira, C. Escribano Villa, E. Vidal Vázquez and A. Paz González</i>	257
Farm-soil mapping using NIR-technique for increased sample point density <i>J. Wetterlind, B. Stenberg and M. Söderström</i>	265
Section 2d - Spatial variability: yield and quality	271
A yield mapping system for hand-harvested fruits based on RFID and GPS location technologies <i>Y. Ampatzidis, S. Vougioukas, D. Bochtis and C. Tsatsarelis</i>	273
Yield variability as an index supporting management decisions: YIELD _{EX} <i>R.P. de Oliveira, B. Whelan, A. McBratney and J. Taylor</i>	281
Estimation of yield maps using yield data from a few tracks of a combine harvester and aerial images <i>H. Domsch, M. Heisig and K. Witzke</i>	289
Quality mapping of field crops <i>A. Hetzroni, U. Zig, S. Warshavsky and S. Yosef</i>	297
Evaluation of model-based site-specific nitrogen applications on wheat yield and environmental quality <i>J. Link, W.D. Batchelor, S. Graeff and W. Claupein</i>	303
Evaluation of site-specific N-fertilization strip trials in cereals taking account of spatial correlation of yield data <i>H. Thöle, C. Richter, B. Kroschewski and D. Ehlert</i>	309
Section 3a - Technology: sensors	315
Assessment of laser rangefinder principles for measuring crop biomass <i>D. Ehlert, R. Adamek and H-J. Horn</i>	317
Colour index evaluation method for plant segmentation from a soil background <i>M. Golzarian, J.M.A. Desbiolles and M.K. Lee</i>	325
Depth determination of a wireless underground Soil Scout <i>M. Hautala and J. Tiisanen</i>	333

Influence of the sugar beet spatial arrangement on yield mapping of sugar beet using UWB radar <i>M. Konstantinovic, S. Woeckel, P. Schulze Lammers and J. Sachs</i>	341
Improved adaptive detection of volunteer potato plants in sugar beet fields <i>A.T. Nieuwenhuizen, J.W. Hofstee, E.J. van Henten</i>	349
Field specific overview of crops using UAV (Unmanned Aerial Vehicle) <i>A. Rydberg, M. Söderström, O. Hagner and T. Börjesson</i>	357
Thermal imaging for estimating and mapping crop water stress in cotton <i>E. Sela, Y. Cohen, V. Alchanatis, Y. Saranga, S. Cohen, M. Möller, M. Meron, A. Bosak, J. Tsipris and V. Orolov</i>	365
Comparison of three active hand-held NDVI (normalized difference vegetation indices) remote sensors for nitrogen management in corn <i>T.M. Shaver, D.G. Westfall and R. Khosla</i>	373
Information integration between farm and processing facility <i>J.A. Thomasson, Y. Ge and R. Sui</i>	381
Mobile measurement of canopy development and nitrogen status <i>A. Thomsen and K. Schelde</i>	389
Wireless Soil Scout prototype radio signal quality compared to attenuation model <i>J. Tiisanen</i>	397
Section 3b - Technology: application equipment	405
A patch-size index to assess machinery to match soil and crop spatial variability <i>H.W. Griepentrog, E. Thiessen, H. Kristensen and L. Knudsen</i>	407
Development of a low-cost technique to measure the outlet velocity of fertiliser grains from a rotary disc <i>Jürgen Vangeyte, Paul Van Liedekerke and Bart Sonck</i>	415
Section 3c - Technology: autonomous vehicles & guidance	423
GPS-based auto-guidance test program development <i>V.I. Adamchuk, R.M. Hoy, G.E. Meyer and M.F. Kocher</i>	425
People, robots and systemic decision making <i>B.S. Blackmore and C.P. Blackmore</i>	433
Methodology for a labour extensive and semi-automated field trial design using autoguidance and conventional machinery <i>R.N. Jørgensen, C.G. Sørensen, H.T. Søgaard, K. Kristensen, O. Green and S. Christensen</i>	441

How Galileo improves farming: effects on existing and near future GNSS applications and services in agriculture	449
<i>K. Molenaar, D.A. van der Schans, T. van der Wal, T. Turecki and P. Trojáček</i>	
Economic potential of robots for high value crops and landscape treatment	457
<i>S.M. Pedersen, S. Fountas and S. Blackmore</i>	
Implications of topography on field coverage when using GPS-based guidance	465
<i>T.S. Stombaugh, B.K. Koostra, C.R. Dillon, T.G. Mueller and A.C. Pike</i>	
Potential of controlled traffic farming with automatic guidance on an organic farm in the Netherlands	473
<i>G.D. Vermeulen, J. Mosquera, C. van der Wel, A. van der Klooster and J.W. Steenhuizen</i>	
Path tracking control for autonomous tractors with reactive obstacle avoidance based on evidence grids	483
<i>S. Vougioukas</i>	
Section 4 - Weed & pest detection & control	491
Inter and intra-row mechanical weed control with rotating discs	493
<i>A.P. Dedousis, R.J. Godwin, M.J. O'Dogherty, N.D. Tillett and A.C. Grundy</i>	
Continous mapping of <i>Rumex obtusifolius</i> during different grassland growths based on automatic image classification and GIS-based post processing	499
<i>S. Gebhardt and W. Kühbauch</i>	
Simulation of perspective agronomic images for weed detection	507
<i>G. Jones, Ch. Gée and F. Truchetet</i>	
Early detection of leaf rust and powdery mildew infections on wheat leaves by PAM fluorescence imaging	515
<i>J. Kuckenber, I. Tartachnyk, M. Schmitz-Eiberger and G. Noga</i>	
Image acquisition for weed detection and identification by digital image analysis	523
<i>M. Sökefeld, R. Gerhards, H. Oebel and R.-D. Therburg</i>	
Occurrence of fungal leaf pathogens in sugar beet fields monitored with digital infrared thermography	529
<i>I. Stenzel, U. Steiner, H.-W. Dehne and E.-C. Oerke</i>	
Feature extraction for the identification of weed species in digital images for the purpose of site-specific weed control	537
<i>M. Weisa and R. Gerhards</i>	
Section 5 - Precision horticulture & viticulture	545
Test of NDVI information for a relevant vineyard zoning related to vine water status	547
<i>C. Acevedo-Opazo, B. Tisseyre, S. Guillaume and H. Ojeda</i>	

Apple yield mapping using hyperspectral machine vision <i>V. Alchanatis, O. Safren, O. Levi and V. Ostrovsky</i>	555
Variable dose rate sprayer prototype for tree crops based on sensor measured canopy characteristics <i>A. Escolà, F. Camp, F. Solanelles, J. Llorens, S. Planas, J.R. Rosell, F. Gràcia and E. Gil</i>	563
Tomato yield and quality prediction by using a calibrated, satellite-based, green vegetation index (GVI) <i>R. Ortega, A. Esser, A. Inostroza, and L. Jara</i>	573
Grape berry calibration by computer vision using elliptical model fitting <i>G. Rabatel and C. Guizard</i>	581
Modelling the variability of spray deposit on orchard structures <i>P.J. Walklate, J.V. Cross, G.M. Richardson and A.L. Harris</i>	589
Section 6 - Management zones	597
Delineating management zones to apply site-specific irrigation in the Venice lagoon watershed <i>M. Chiericati, F. Morari, L. Sartori, B. Ortiz, C. Perry and G. Vellidis</i>	599
Site-specific management zones: seven years of research in the irrigated Western Great Plains of the US <i>R. Khosla, D. Inman and D.G. Westfall</i>	607
Delineation of management zones for site-specific management of parasitic nematodes using geostatistical analysis of measured field characteristics <i>B. Ortiz, D. Sullivan, C. Perry, G. Vellidis, L. Seymour and K. Rucker</i>	615
Management zone delineation based on remotely-sensed data <i>P. Roudier, B. Tisseyre, H. Poilvé and J.-M. Roger</i>	625
Section 7 - Remote sensing	633
Predicting chlorophyll meter readings with aerial hyperspectral remote sensing for in-season site-specific nitrogen management of corn <i>Y. Miao, D.J. Mulla, G.W. Randall, J.A. Vetsch and R. Vintila</i>	635
Estimating rice shoot biomass and nitrogen concentration from hyperspectral canopy reflectance data using the first derivative and multiple stepwise regression analyses <i>H.T. Nguyen, K.-J. Lee, J.-D. Fu, Y.-F. Yan and B.-W. Lee</i>	643
Relationships between remote-sensed data, spatial distribution of <i>Ridolfia segetum</i> and sunflower yield map, a preliminary approach <i>J.M. Peña-Barragán, F. López-Granados, M. Jurado-Expósito and L. García-Torres</i>	651

Use of reflectance measurements to determine the N demand of broccoli plants (<i>Brassica oleracea</i> convar. <i>botrytis</i> var. <i>italica</i>) <i>J. Pfенning, S. Graeff, W. Claupein, H.-P. Liebig</i>	657
Spectral index for assessing heading timing of spring wheat grown under semi-arid conditions <i>A. Pimstein, D.J. Bonfil, I. Mufradi and A. Karnieli</i>	663
Section 8 - Variable application	671
Effects of N-Sensor based variable rate N fertilization on combine harvest <i>A. Feiffer, J. Jasper, P. Leithold and P. Feiffer</i>	673
Variable-rate fertilizer application assessment using an as-applied methodology <i>J. Fulton, S. Shearer, S. Higgins, T. McDonald, C. Dillon and T. Stombaugh</i>	681
The potential of “precision” recommendations for site-specific phosphorus, potassium and lime applications <i>J.H. Grove and E.M. Pena-Yewtukhiw</i>	689
Within-crop variability affecting variable N application to winter wheat <i>J. Kren, R. Smoldas, V. Lukas and P. Misa</i>	697
Development and evaluation of an on-the-go visible and near infrared soil sensor-based variable rate phosphorus fertilisation system <i>M.R. Maleki, A.M. Mouazen, B. De Ketelaere, H. Ramon and J. De Baerdemaeker</i>	705
Section 9 - Information management & decision support	713
On-line co-ordination of combines and transport carts during harvesting operations <i>D. Bochtis, S. Vougioukas, Y. Ampatzidis and C. Tsatsarelis</i>	715
Developing a learning mechanism for a spatial decision support system for medfly control in citrus <i>A. Cohen, Y. Cohen, D. Broday, A. Hetzroni, V. Alchanatis, D. Timar and Y. Gazit</i>	723
Testing decision rules for sowing and nitrogen fertilisation of cereals, at sites of high soil variability- a GIS approach for on-farm research <i>D. Dicke and S. Gebhardt</i>	731
Precision timing and spatial allocation of economic fertilizer application considering suitable field days <i>J. Gandonou and C.R. Dillon</i>	737
Case study of on-farm trials, spatial analysis and farm management decision making <i>T.W. Griffin, C.L. Dobbins and J. Lowenberg-DeBoer</i>	745
Optimising data flows in precision agriculture using open geospatial web services <i>E. Nash, P. Korduan and R. Bill</i>	753

Impact of precise radar rainfall information on the accuracy with which crop disease can be modelled <i>J. Orensanz, D. Boisgontier, S. Strizyk and E. Moreau</i>	761
Precision agriculture adoption and the optimal location of technology providers in Kentucky, USA <i>J.M. Shockley, C.R. Dillon and S. Saghaian</i>	769
Economic benefits of neural network-generated site-specific decision rules for nitrogen fertilization <i>P. Wagner and M. Schneider</i>	775
Site-specific disease control in wheat by combining the CROP-Meter with the decision support system proPlant <i>J. Wollny, K.-H. Dammer, B. Hau, T. Volk and T. Wischke</i>	783
Section 10 - Traceability	791
Stakeholder requirements for traceability systems <i>C.P. Gasparin, S. Peets, D.W.K. Blackburn and R.J. Godwin</i>	793
RFID tags for identifying and verifying agrochemicals in traceability systems <i>S. Peets, C.P. Gasparin, D.W.K. Blackburn and R.J. Godwin</i>	801
Section 11 - Profitability, adoption & environment	809
Assessment of in-field heterogeneity for determination of the economic potential of precision farming <i>S. Begiebing, M. Schneider, H. Bach and P. Wagner</i>	811
Improved profitability via enhanced resolution of variable rate application management in grain crop production <i>C.R. Dillon, S. Shearer, J. Fulton and S. Pitla</i>	819
Profitability and uptake of nitrogen application system based on remote sensing on 90 commercial farms in the United Kingdom <i>S.J. Griffin</i>	827
Evaluation of profitability across site-specific management zones in irrigated maize production fields <i>D. Inman, R. Khosla, W.M. Frasier, D.G. Westfall and B. Koch</i>	835
Adoption and perspective of precision farming (PF) in Germany: results of several surveys among the different agricultural target groups <i>M. Reichardt and C. Jürgens</i>	843
Incorporating economic criteria into the optimal delineation of management zones <i>D. Rogers, T. Ancev, A. McBratney and B. Minasny</i>	851

Section 12 - Education and training	859
An educational workshop on the use of precision agriculture as a risk management tool <i>C.R. Dillon, T.S. Stombaugh, B. Kayrouz, J. Salim and B.K. Koostra</i>	861
Keyword index	869
Authors index	873
